ACKNOWLEDGMENTS

Many staff members of the Governments Division participated in the preparation of this report. Statistics for the 43 largest cities, and also for a limited proportion of smaller municipalities, were assembled by the Compilation Branch, headed by Francis M. Twiss. Other city finance data were examined by the Surveys Branch, headed by Kenneth E. Anderson.

The Processing Division of the Bureau carried out machine processing work in accordance with specifications prepared by Sherman Landau of the Governments Division. Tabulation work within the Governments Division was handled mainly by the Management and Operations Branch, headed by Marjorie Ball. Lynden Mannen reviewed the publication copy.

Grateful acknowledgment is made of the cooperation of the numerous municipal finance officials who kindly provided information for this report.

Introduction

Revenue of city governments altogether, during fiscal 1965-66, amounted to \$21.9 billion, as against \$20.3 billion in 1964-65.

Total revenue consists of all revenue received from external sources by the city corporations and their dependent municipal agencies, including any city-operated utilities and employee-retirement systems. General revenue--i.e., revenue excluding utility and employee-retirement amounts--was approximately \$17.3 billion in fiscal 1965-66, compared with \$15.9 billion the previous year.

City expenditure totaled \$22.4 billion in 1965-66, as against \$20.7 billion in 1964-65. General expenditure--i.e., spending other than for utility and employee-retirement purposes--totaled \$17.4 billion in 1965-66.

National totals on the finances of cities are presented in tables 1 and 2. As suggested by the column headings, there is some discontinuity in the statistics summarized historically in table 1. Amounts shown there for "1963" pertain to municipal fiscal years which ended during that calendar year, while amounts shown for the more recent periods pertain to municipal fiscal years which closed within the 12 months ended June 30 of the later year specified.

Table 3 shows a distribution of financial amounts by city size groups, based on the 1960 Census of Population and 1962 Census of Governments.¹ Per capita amounts, by city size-groups, appear in table 4.

GENERAL REVENUE

City-imposed taxes yielded \$9.8 billion in fiscal 1965-66 or nearly three-fifths of all general revenue of city governments. Property taxation continued as the predominant revenue source supplying \$6.9 billion. Other municipal tax amounts, as shown in table 1, consisted of approximately \$1.2 billion from general sales and gross receipts taxes, \$611 billion from selective sales taxes, and \$1.1 billion from licenses and miscellaneous other taxes.

Municipalities received about \$3.3 billion from State governments in fiscal 1965-66. This, together with lesser sums received directly from the Federal Government and from other local governments (mainly counties), made the total of city intergovernmental revenue \$4.1 billion, or almost one-fourth of general revenue from all sources.

¹Size-class distributions of municipal governments, together with related population figures, are shown nationally and for States and metropolitan areas in Governmental Organization (Vol. I of the 1962 Census of Governments).

Sources other than taxes and intergovernmental revenue supplied \$3.3 billion of municipal general revenue in fiscal 1965-66. This included \$2.1 billion from current charges (other than for utility services, classed separately as utility revenue).

GENERAL EXPENDITURE

As indicated by table 1, education takes a larger share of city expenditure than any other function, even though most of this spending is by the small fraction of municipal governments (including New York City and some other very large units) that directly administer local public schools. In most cities, public schools are administered by independent school districts, for which financial data are not included in this report.

Following is a summary functional distribution of municipal governments' general expenditure in fiscal 1965-66:

Table 1 shows annual functional expenditures for 1965-66 and selected previous years, with distributions indicating capital outlay amounts separately for several major functions.

Introduction

EXPENDITURE BY CHARACTER AND OBJECT

Nearly two-thirds of all municipal expenditure in fiscal 1965-66 (including amounts for utility and insurance-trust purposes as well as general-government purposes) was for current operation. Expenditure of this nature amounted to \$14.9 billion.

Capital outlay--mostly for construction, but also including spending for equipment and the purchase of land and existing structures--amounted to \$4.9 billion, or nearly one-fourth of all municipal expenditures.

Payments of interest on debt (including utility as well as general municipal debt) amounted to \$1.0 billion, insurance benefits and repayments were \$656 million, and intergovernmental expenditure amounted to \$268 million. Cash assistance payments totaled \$587 million.

Expenditure for personal services was about \$9.8 billion in fiscal 1965-66, and thus approached one-half of all municipal expenditure. Personal service costs are mainly for current operation but include also some amounts for personnel engaged in construction work.

INDEBTEDNESS AND DEBT TRANSACTIONS

At the end of fiscal 1965-66, municipal indebtedness totaled \$33.7 billion, or 5.8 percent more than a year earlier. The debt total included \$19.0 billion of long-term indebtedness pledging the cities' full faith and credit, \$11.9 billion of nonguaranteed long-term debt, and \$2.8 billion of short-term debt.

During fiscal 1965-66, municipalities issued about \$3.7 billion of long-term debt, including more than \$900 million for utility purposes. Their retirement of long-term debt during this fiscal year totaled \$1.9 billion, including more than \$500 million of utility indebtedness.

CASH AND SECURITY HOLDINGS

Financial holdings of municipalities amounted to \$19.8 billion at the end of fiscal 1965-66. Of this sum, \$8.3 billion represented employee-retirement system holdings, \$3.1 billion was held as offsets to long-term debt, \$2.7 billion consisted of the proceeds of bond issues held pending disbursement, \$67 million comprised unemployment compensation balances of Washington, D. C., and the remaining \$5.7 billion represented holdings of all other city funds, including public trust and investment funds.

CITY UTILITIES AND LIQUOR STORES

Municipal governments commonly operate water supply systems and some of them also operate other utilities--electric power, gas supply, and local transit systems. Financial

data for these various types of utilities are shown in table 2. In a few States, certain municipal governments also have liquor store systems. Summary figures for these undertakings appear in table 1.

City utility revenue in fiscal 1965-66 totaled \$3.9 billion, including \$1.7 billion for water supply systems and \$1.5 billion for electric power systems. Utility expenditure amounted to \$4.2 billion, of which \$2.5 billion was for current operation, \$1.3 billion was capital outlay, and the other \$374 million was interest on utility debt.

Municipal indebtedness for utilities at the end of the fiscal year amounted to \$11.2 billion, or nearly one-third of all city debt outstanding.

FINANCES OF MUNICIPAL EMPLOYEE-RETIREMENT SYSTEMS

Municipal revenue in 1965-66 included employee-retirement revenue of \$595 million, consisting of employee contributions and the earnings on retirement system investments. In addition, these retirement systems received \$742 million of employer contributions from their parent municipalities (including \$18 million of State payments for this purpose).

Benefits and withdrawals paid by municipal retirement systems in 1965-66 totaled \$648 million, and their financial assets at the end of the fiscal year amounted to \$8.3 billion, as shown in table 1.

The foregoing figures pertain only to municipally administered employee-retirement systems. They do not include amounts for State-administered systems--some of which provide coverage for municipal employees--nor for the Federal program of Old Age, Survivors, Disability, and Health Insurance. Employer payments by participating cities to such other retirement programs are included here as a part of municipal general expenditure for current operation.²

SIZE-GROUP STATISTICS

Financial statistics for various population-size groups of municipal governments appear in tables 3 and 4. It should especially be noted that the figures for cities of less than 50,000 represent estimates based on a limited sample.

²Additional data on finances of municipal employee-retirement systems, including figures individually for major systems, appear in the Census Bureau report, Finances of Employee-Retirement Systems of State and Local Governments in 1965-66. More detailed 1962 data, including information on membership, coverage classes, and beneficiaries, are supplied in the report, Employee-Retirement Systems of State and Local Governments (Vol. VI, No. 1 of the 1962 Census of Governments).

Introduction

3

Amounts shown for detailed financial categories are likely to involve a considerable degree of sampling variation.

As will be evident from the functional detail in tables 3 and 4, the relative financial scale of cities in the several size groups is strongly affected by variations in the scope of municipal government responsibilities. In 9 of the 43 cities of over 300,000 population, public schools are operated by the municipal corporation rather than by an independent school district, as is far more commonly the case. Furthermore, 11 of these 43 largest municipalities (including 7 of the 17 cities with 500,000 to 1 million inhabitants) are in effect composite city-county governments. Nearly all smaller municipalities, on the other hand, are located in areas which are served also by a separate county government.

INDIVIDUAL-CITY DATA

Financial statistics for each of the 310 cities having at least 50,000 inhabitants in 1960 are presented in table 5. The cities are arranged alphabetically by States. Any intercity comparisons based upon these figures should be made with caution, and with due recognition of variations that exist among urban areas in the relative role of the municipal corporation, as discussed below under "Coverage and Limitations of Data."

Table 5 also supplies data for major town and township governments in certain States where such governments are similar to cities in organization and local services provided. These governments can be distinguished from municipalities, in table 5, by the fact that their designation in each instance includes the term "town" (for Connecticut and Massachusetts units) or "township" (for New Jersey and Pennsylvania units). The municipal aggregates presented in tables 1 to 4, however, include no amounts for township (or "town") governments.

Table 6 provides a more detailed array of financial information for each of the 43 municipalities having at least 300,000 inhabitants in 1960. Operating statements for utility systems operated by these city corporations are shown in table 7.

COVERAGE AND LIMITATIONS OF DATA

Data in this report relate only to municipal corporations and their dependent agencies, and do not include amounts for other local governments overlaying city areas. Therefore, expenditure figures here for "education" do not include spending by the separate school districts which administer public schools within most municipal areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and other functions to a lesser degree, also have an important effect upon reported amounts of city expenditure, revenue, and debt.

Table 5 shows the population of each of the cities reported individually, as found by the 1960 Census of Population. In the annual Census Bureau "Compendium" reports on city finances for 1960 through 1963, per capita figures were presented for the individual cities. However, because the various cities have differed considerably in rate of population change since 1960 and more recent population figures are not available, this report does not include per capita figures for individual municipalities.³ As indicated above, 1960 population figures were used to derive the size-group statistics presented in tables 3 and 4.

The 1965-66 fiscal years reported are those which closed in the 12 months ended June 30, 1966. A majority of municipalities end their fiscal years on December 31; the next most common financial period is the 12 months ending June 30.

The sample for this annual survey was designed to yield all-city aggregates which, for selected major items, would be subject to sampling variability of approximately 1 percent; but greater variability than this is likely to apply to the aggregates for certain financial categories. The amounts given separately for cities of less than 50,000 in tables 3 and 4 are subject to relatively high sampling variation. Figures appearing for minor components have been included only to indicate the composition of larger aggregations.

While the annual all-city aggregates reported in table 1 probably resemble the results of a complete enumeration, interpretation of apparent interyear changes must be made with due allowance for the estimated nature of the data.

RELATED REPORTS

The report Finances of Municipalities and Township Governments (Vol. IV, No. 3 of the 1962 Census of Governments) presents municipal finance data for fiscal 1962 in considerable detail, including figures for size-groups of municipalities, State by State, and figures individually for municipalities of 10,000 inhabitants or more.

³Current Population Reports, Series P-25, No. 347, issued in August 1966, supplies estimates of the population of the 55 largest standard metropolitan statistical areas ("SMSA's"), as of July 1, 1965, including figures for each of the component county-type areas within those major SMSA's. Population figures appear in that report for 9 of the 43 largest cities--Baltimore, Denver, Honolulu, New Orleans, New York, Philadelphia, St. Louis, San Francisco, and Washington, D.C.--and also for 4 Virginia cities of lesser population.

Introduction

The annual report, Governmental Finances in 1965-66, provides estimated nationwide financial aggregates covering other types of local governments as well as municipalities, together with State and Federal Government data.

SOURCES OF DATA

For this report, information was requested from all municipalities that had at least 25,000 inhabitants in 1960, and from a stratified random sample of smaller municipal governments.

For the 43 cities with 300,000 inhabitants or more and for a limited number of smaller cities, the basic data were compiled by Census Bureau representatives from official reports and records, with the advice and assistance of local officers and employees. Information for other cities was supplied by local officials in response to a mail canvass that involved the use of detailed census questionnaires. The mail reports were examined intensively, and followup correspondence was used to supplement and verify questionable figures.
